

Environmental & Sustainability Manager

Task Sheet

- Research and work out which renewable energy resource your team will be using for each house type
- Discuss this with the Quantity Surveyor so they can work out costs
- Consider the habitat in the area
- What could live in the gravel pit which is full of water and the woodlands areas and what could you do to protect the habitat
- Could you create/build something to enhance the habitat and wildlife of the area
- What else could you include to enhance the sustainability aspects of your village
