

## **Design Manager Tasks**

- In the top right-hand corner draw a compass symbol showing North, South, East and West, you will need to consider this is using solar panels.
- In the middle of the field is a small gravel pit full of water, draw this on the plan
- To the North and West are wooded areas, draw this on the plan
- To the South is a dual carriageway, draw this on the plan
- Along the East boundary of the field runs a B road (B3406) which connects with the dual carriage way to the South, draw this on the plan
- You are required to build a 12 house village
- There should be some way of getting to every house at least by footpath and have a footpath to the door, draw this on the plan
- There must be at least one access road on and off the village, draw this on the plan
- Each property must have somewhere to park at least one vehicle, draw this on the plan
- The village design should include some public space such as a park, playing field, picnic area or anything else that you wish to include
