

CARING FOR OUR WORLD – SUSTAINABILITY POSTERS

LEARNING OBJECTIVES:

To be able to use our creativity to express care and concern for our environment.

Suggested Resources:

Carry out a Google image search for 'caring for nature poster', or 'sustainability poster'. Have a selection of these images ready to share.

Script:

"Last session we watched the video clip *'Who Owns the Sky'*. One of the issues that the film raised was that natural resources like water are finite – that means that they cannot be used in a wasteful or unsustainable way.

This week I would like you to create a poster encouraging people to care for our natural resources by using them in a sustainable way."

Character Coaching

Guidance:

What would a poster look like that had not been produced with care?

Meaningful Praise:

You are being so careful with your lettering, that's why the quality is so good!

Your careful choice of colours has created a really striking result!

Share some of the posters from your image search.

Draw the children's attention to the clarity of the lettering which needs to be legible from a distance with simple striking images. Before the children start, use the guidance phrase from teacher talk below: What would a poster look like that had not been produced with care?

I want you to practise caring in your work by planning out the poster first on scrap paper and ensuring that any lettering is striking and can be read from a distance.

Suggested Activities:

The posters could be created in the school IT suite, or painted onto A4 paper.

Correction:

Please be careful with your spelling so that your poster is legible.
